

To know the true value of books, and to derive any satisfactory benefit from them, you must first feel the sweet delight of buying them—you must know the preciousness of possession.—J. M. Baldwin.

Books of Reference Are Valuable

Among the first necessities in establishing a new home are surely a dictionary, an atlas, and an encyclopedia. These form the foundation of a home shelf, ruled by mind and spirit. Then when come the children, these will form the basis of their reading. But the children also require books of the imagination and for instruction especially adapted to their needs, although a mistake is made if they are fed with too much predigested book knowledge.

Why You Should Buy Books?

A man is known not only by the human company that he keeps, but by his book companions. An observing person can judge fairly well of a man's character by his possession of books—or their lack—and by their character. For books, since the advent of the printing press, are no longer a luxury but a necessity.

Books Are Ornamental As Well As Useful

There are few things that so ornament a room as do books, for they breathe not only of material things, but of soul. Books upon the table, beautiful in content, with dress and illustrations to match, give charm to a room, however simple its other appointments. And there is nothing more attractive than the book-case filled with books, well bound, for frequent use, and with others more handsomely made up for rarer hours, their difference in color, size and shape lending pleasing variety and completeness to the furnishing of the library.

A Good Book Is An Honest Friend

Books are to be viewed not only as necessities but as valued friends. They are friends who will not desert us if fortune turns upon us the cold shoulder and other friends forsake. But to derive the best results from their friendship, the longer our familiarity with them, the better. Hence it is best to cultivate their acquaintance day by day, that in the hour of trial, depression or joy, one may know to what to turn for sympathy. Here are essays, histories, books alive with wise counsel, and inspiration, stimulation, books religious and philosophic, books serious and books teeming with graceful fancy or merry wit, all at our service, if we but know them. And how attached we grow to the books long known and handled! What joy, after long saving of odd dimes and nickels, to be able to buy that volume on which the heart has been long set! How truly we feel that a new friendship has been established!
